Be better than yesterday!

Education

July 2010 **Bachelor in Informatics and Information Technologies**, Slovak University of Technology, Bratislava, Slovakia.

Experience

Sep 2022 - **Senior Application Developer**, *Livesport s.r.o.*, Prague, CZ.
now

Jan 2019 - **Automatization Systems Team Leader**, *Livesport s.r.o.*, Prague, CZ.

Sep 2022 Again after two years of successful proving my skills, I was promoted to the new role as a team leader of my current team. New responsibilities was added to me like cooperation between departments, assessment of my team mates, work plan creation, both on the monthly and on the annual basis.

Feb 2016 - **Web developer**, *Livesport s.r.o.*, Prague, Czech Republic.

Dec 2018 Livesport is world leader in providing the live scoring media, delivering instant updates from over 35 major sports in the shortest time possible.

My main work here consists from analyzing, developing and subsequent optimizing tools for automated processing of sport data and video in real time. This is closely related to processing, analyzing and visualization huge amount of data.

Oct 2014 - **Development manager**, *Ušetřeno.cz s.r.o.*, Prague, Czech Republic.

Jan 2016 After two years of successful proving my skills, I was promoted to the new role as development manager. In addition to leading a team of 8 young experts, which included work planing, regular evaluation and feedback, my job also included communication and planing between departments and technical design of new solutions, improvements and optimization of our application.

Sep 2012 - **Senior backend developer**, *Ušetřeno.cz s.r.o.*, Prague, Czech Republic.

Sep 2014 Ušetřeno.cz s.r.o. is the biggest online broker and lead-generation specialist in the Czech Republic with over 750.000 real customers (Jan 31, 2015) and more than a hundred team members.

The main focus of my work was the development of the main application usetreno.cz. In addition to solving requested tasks, it was the suggestion and subsequent implementation of own improvements to increase stability and application performance. Due to high traffic, improvements included an optimization to the database, application and display layer and, finally automated testing and deployment.

- Nov 2009 - **Web developer**, *Global Services Slovakia s.r.o.*, Bratislava, Slovakia.
 Aug 2012 The company operates in the market of information systems, complex IT solutions, network technologies and web presentation.
 My work consisted of custom development, which included a complete development process. Analysis of customer requirements, suggesting solutions, backend and frontend development. Frontend development included HTML, Javascript (jQuery) and CSS. Development was followed by testing with test scenarios (Selenium) and writing documentation. At the end, product was delivered to customer of course with additional support.
 Mostly there were different kind of eshops, elearning systems, facebook applications etc. Few examples (nov 2018):
- www.brigada.sk - The biggest portal providing summer jobs in Slovakia.
 - www.soga.sk - Auction Company providing online auctions.
 - www.financeacademy.sk - Portal providing elearning courses.
- Jun 2009 - **Web developer**, *Finance Consulting s.r.o.*, Bratislava, Slovakia.
 Oct 2009 Development of internal CRM system.
